

A man with a beard, wearing a light blue button-down shirt over a blue t-shirt, is looking down at a black smartphone in his hands. He is standing in a greenhouse filled with rows of green plants in black trays. In the background, there are large, white, arched greenhouse structures and a range of mountains under a clear blue sky.

APP^OLOG

DISCOVER THE POWER OF
DIGITAL JOB CARDS

KEY FEATURES

We offer **subscription-based software** for companies of all sizes to generate paperless job cards. Your system will also include functionality to manage the surrounding infrastructure such as client and product databases, job-specific forms, support tickets and stock management. Most of the features can be opted out of or customized, depending on your custom workflows.

Employees use a **mobile app** to capture job data, such as client details, work notes, billable hours and products used. The app works fully offline, while also syncing across devices whenever an internet connection is available. Checklists for routine tasks, photos of work and client signatures can also be added. The app uses your company's own name, logo and colour theme.

Managers use a **web interface** for managing the necessary upstream and downstream processes. Upstream processes include managing the client and product database, creating forms and checklists and assigning support tickets. Downstream processes include generating reports, updating stock levels and integrating with invoicing software such as Xero and QuickBooks.

WHY APPOLOG?

We believe that South African companies of all sizes can be empowered through technology. That is why we develop platforms that find the balance between customizability, to preserve individual brand identity and workflows, and similarity of features, to keep subscription costs down. The purpose of our pioneering software suite is to automate a company's internal processes, paperwork and communication through digital job cards. This offers the most value for anyone who manages a team of employees that travel to their clients to render services for which hours and/or products need to be invoiced.

Best for: Plumbers, Electricians, HVAC Technicians, Maintenance Contractors, Security Systems, Pool & Spa Maintenance, Pest Control Technicians, Gate & Garage Door Installers, Landscaping & Garden Services, IT Field Support, Generator Servicing & Repair, Pump & Borehole Technicians.

MAIN BENEFITS INCLUDE:

- **Shorter lag time** between completed jobs and invoicing
- **Fewer mistakes** in billable hours and products used
- Stronger **proof of work** with client signatures
- Reduced workload due to **digitized paperwork**
- Convenient **offline access** to all your latest data
- Seamless **handovers and onboarding** for new employees

CONTENTS

1 Upload products and clients	04
2 Create forms and checklists	05
3 Access client data offline	06
4 Start jobs and make notes	07
5 Add products and photos	08
6 Generate PDF reports	09
7 Manage stock and set alerts	10
8 Automate your invoicing	11
9 Process support tickets	12
10 Customize your app	13

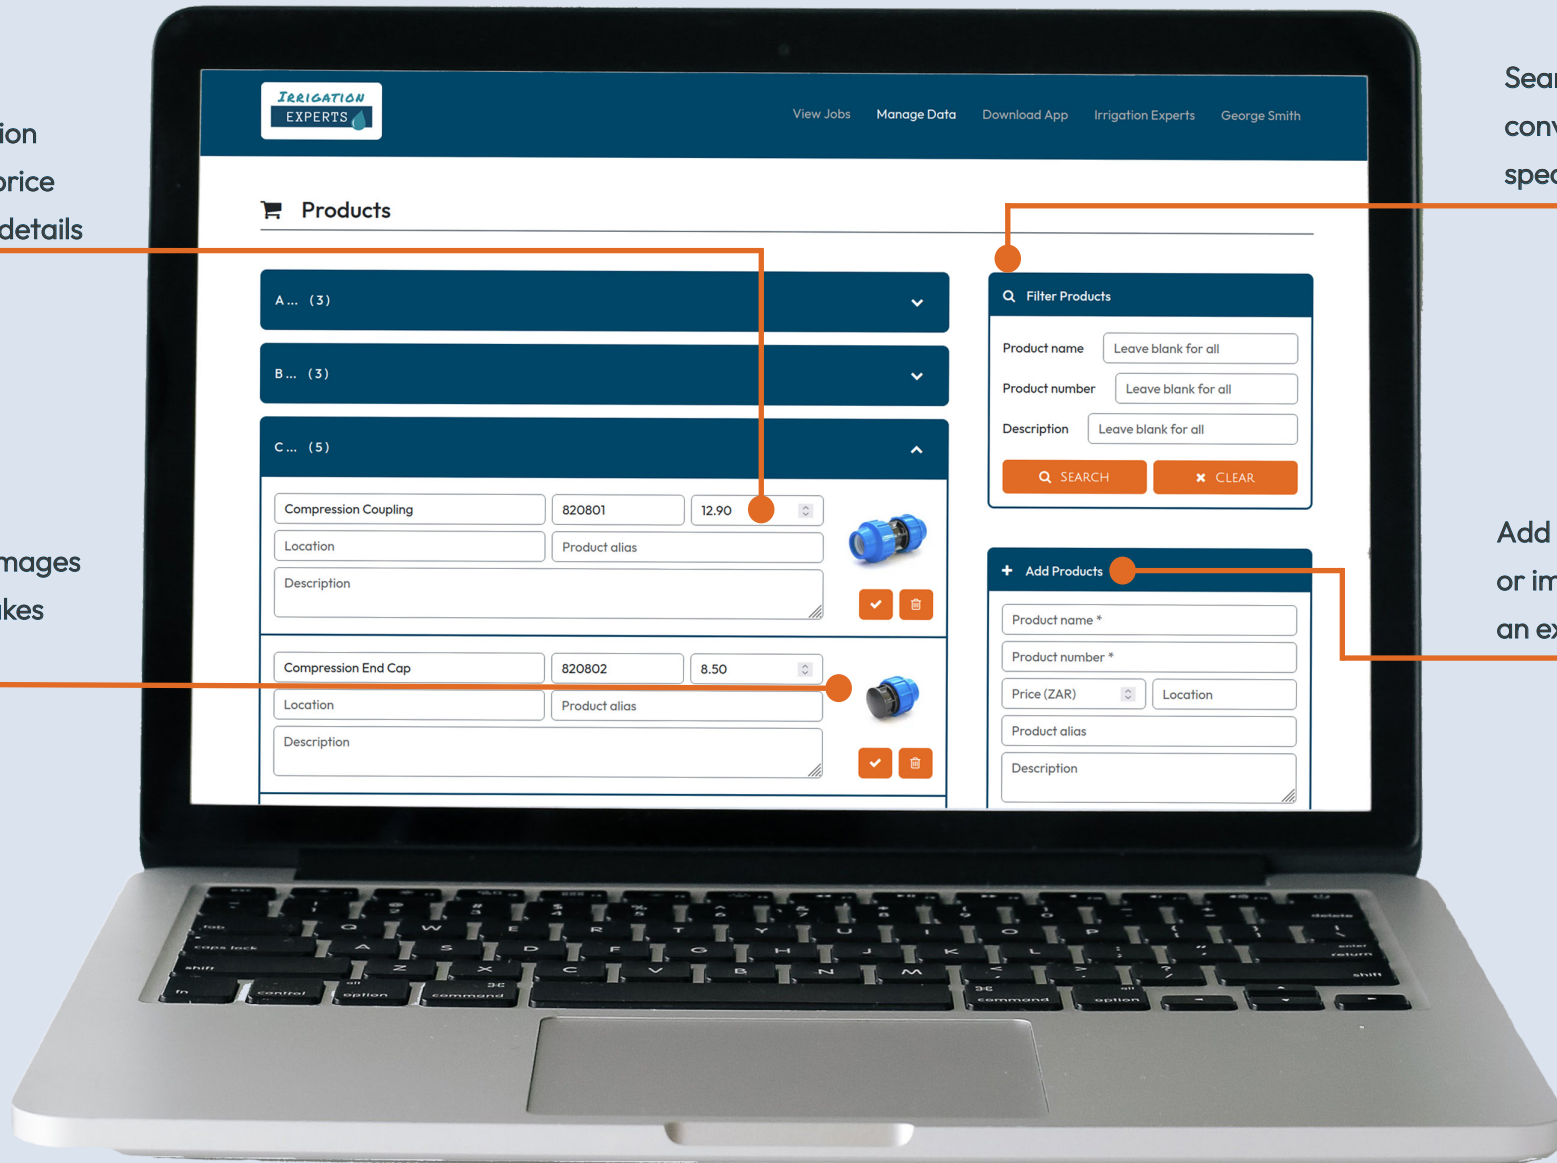

1 UPLOAD PRODUCTS AND CLIENTS

Specify information
such as product price
or client contact details

Upload product images
to minimize mistakes
during jobs

Search database for
convenient access to
specific records

Add records manually
or import in bulk from
an existing database

2 CREATE FORMS AND CHECKLISTS

Manage multiple forms
for all types of jobs

Map custom text boxes or
multiple-choice questions
to your forms

Set up and group
checklists for routine
tasks

Specify whether fields
are compulsory and
edit their appearance

The screenshot displays the 'Irrigation Experts' web application interface for managing forms. The top navigation bar includes links for 'View Jobs', 'Manage Data', 'Download App', 'Irrigation Experts', and a user profile 'George Smith'. A sidebar on the left contains icons for 'Clients', 'Products', 'Stock', 'Forms', and 'Tasks', with 'Forms' currently selected. The main content area is divided into two sections. The left section, titled 'Forms', lists existing forms: 'Call Out', 'Installation', 'Yearly Service', and a 'New form *' button. The right section shows a detailed configuration for a form, with fields numbered 1 through 5. Each field has a text input, a dropdown menu for type (e.g., 'Reason for Visit' is 'Optional', 'Type of Work' is 'Choice', 'Follow-up Required' is 'Yes/No', 'Work Notes' is 'Long', 'Vehicle Used' is 'Dropdown'), and a dropdown for status (e.g., 'Compulsory' or 'Optional'). Below each field, there are checkboxes to map the field to specific forms: 'Call Out', 'Installation', and 'Yearly Service'. For example, 'Reason for Visit' is mapped to 'Call Out' and 'Installation'. The 'Work Notes' field is mapped to all three. The 'Vehicle Used' field is mapped to 'Call Out', 'Installation', and 'Yearly Service'. Each field also has a set of orange icons for editing its appearance and behavior.

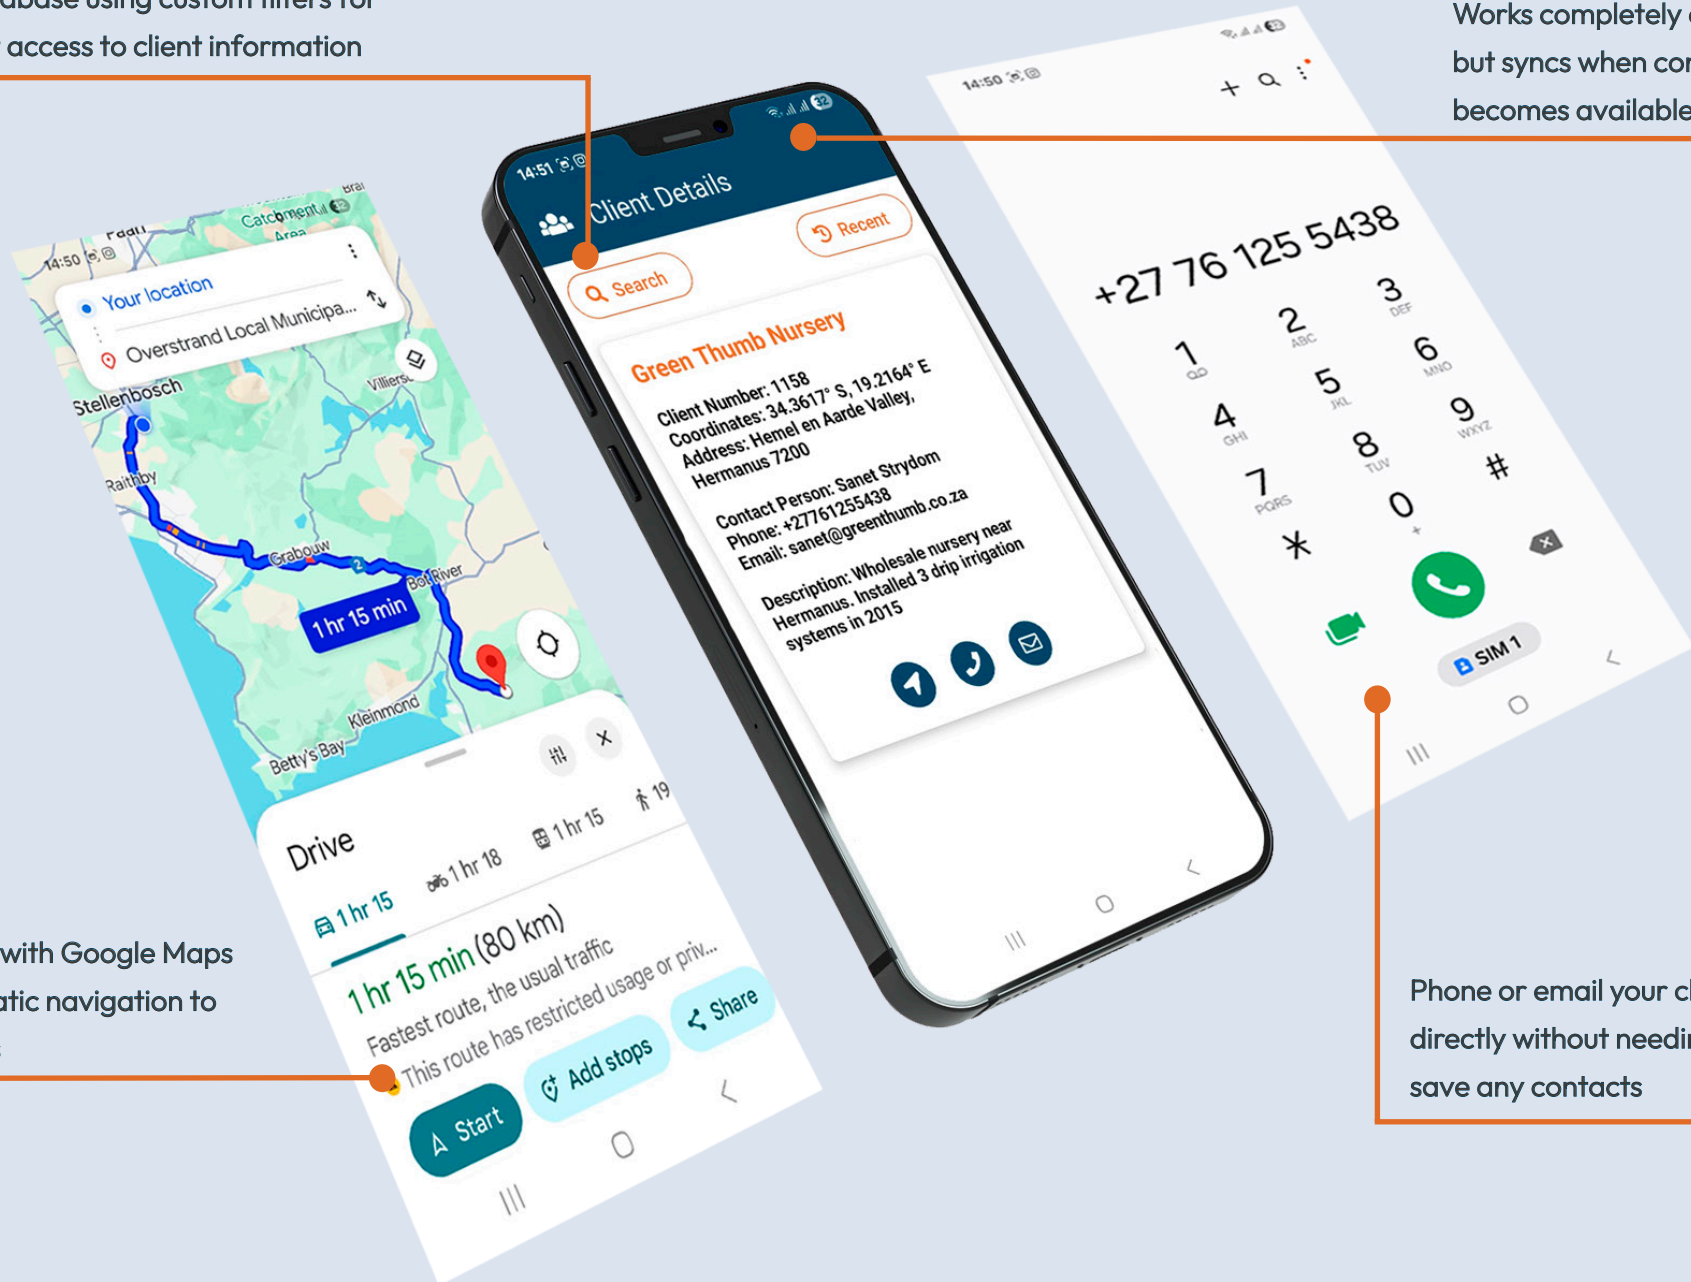

3 ACCESS CLIENT DATA OFFLINE

Search database using custom filters for convenient access to client information

Works completely offline but syncs when connection becomes available

Integrates with Google Maps for automatic navigation to new clients

Phone or email your clients directly without needing to save any contacts

4 START JOBS AND MAKE NOTES

Nearby clients are automatically detected for new jobs, otherwise choose from client list

Pause and resume jobs to accurately capture billable hours

Mark checklists for routine tasks with time stamps for each item

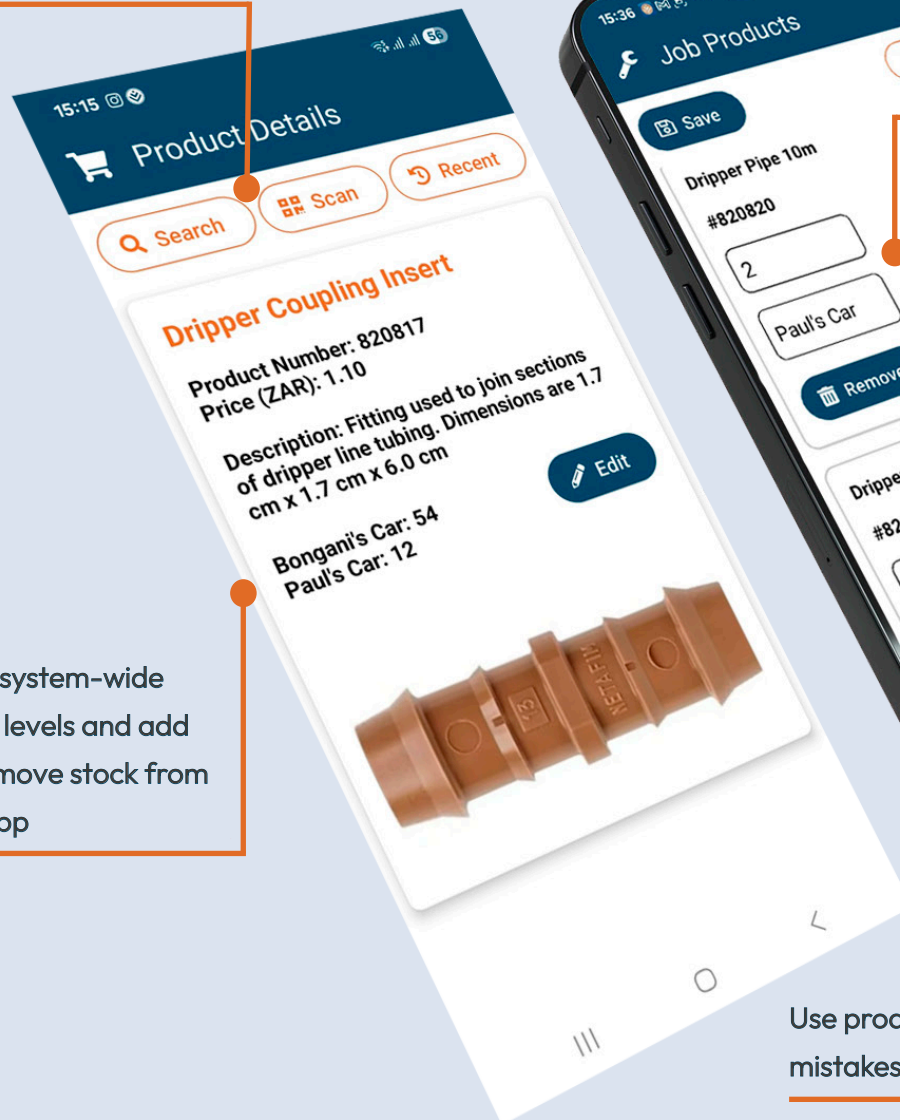

Make notes using text boxes, multiple-choice fields and drop-down lists

Access historic data from all past jobs for easy future reference

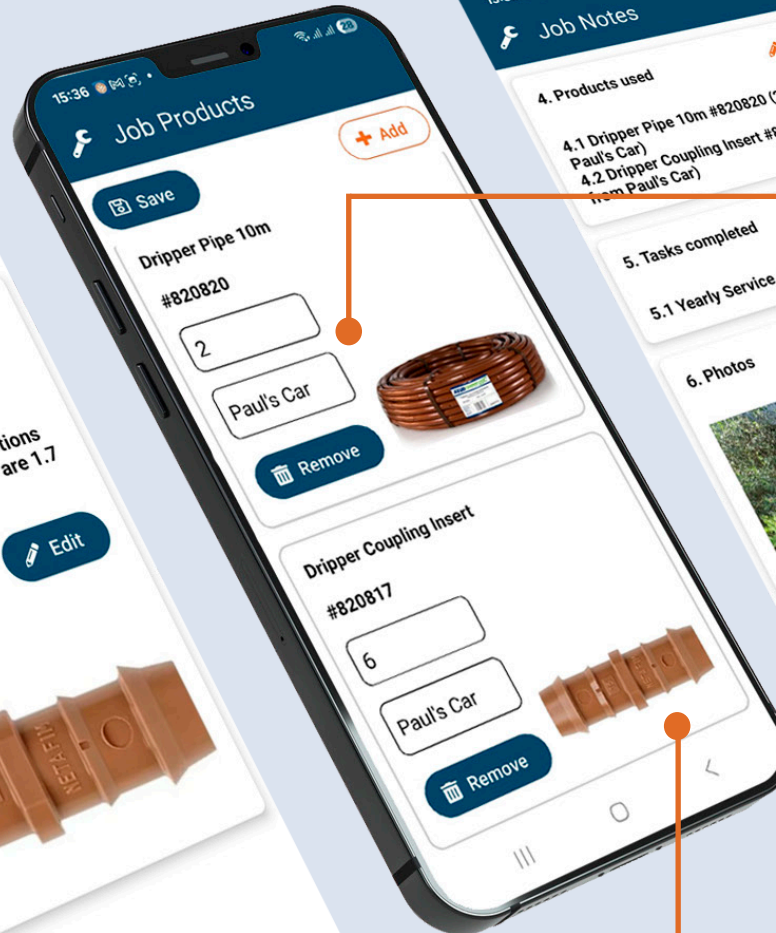

5 ADD PRODUCTS AND PHOTOS

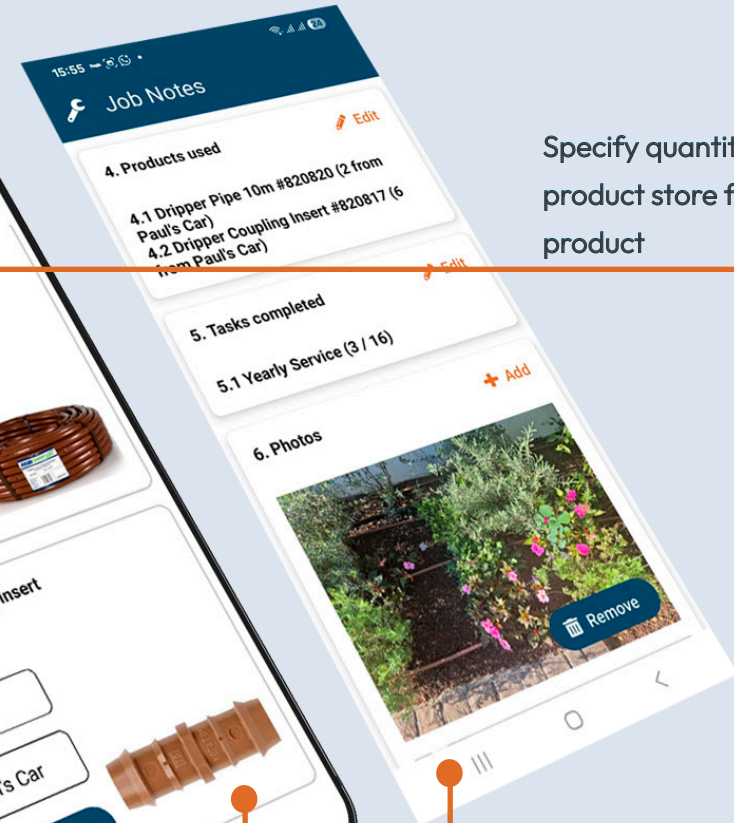

Search for products to add or scan QR codes directly from the app

View system-wide stock levels and add or remove stock from the app

Use product images to minimize mistakes in products used

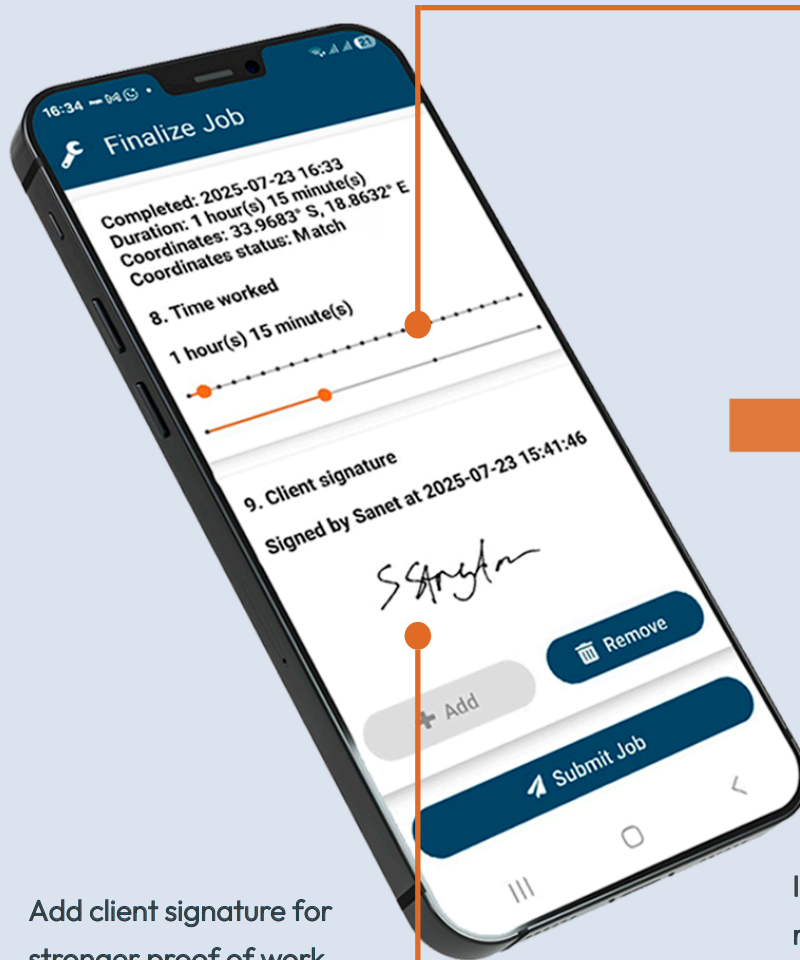

Specify quantity and product store for each product

Add photos for future reference without using any local disk space

6 GENERATE PDF REPORTS

Correct billable hours if different from total duration on site

Add client signature for stronger proof of work

Instantly generate PDF
report and email to selected
stakeholders

Client: Green Thumb Nursery

Person: Sanet Strydom

Address: Hemel en Aarde Valley, Hermanus 7200

Started: Wednesday, 23 July 2025 15:25

Completed: Wednesday, 23 July 2025 16:33

By: Paul Adams

Phone: +27761255438

Email: sanet@greenthumb.co.za

Email: paul.adams@irrigationexperts.co.za

Work Period	Started	Ended	Duration
1	2025-07-23 15:25:07	2025-07-23 15:35:48	10 minute(s)
2	2025-07-23 15:42:01	2025-07-23 16:33:37	51 minute(s)
Total	Note: Fractions of 15 minute(s) are rounded up		1 hour(s) 15 minute(s)
Actual	As specified upon job completion		1 hour(s) 15 minute(s)

Product	Unit Price	Quantity	Total
Dripper Pipe 10m	224.00	2	448.00
Dripper Coupling Insert	1.10	6	6.60
Total	ZAR		454.60

1. Type of Work: * Yearly Service

2. Work Notes: Found a leak in three places (see photos). I replaced the segments using standard couplings

3. Vehicle Used: Toyota Hilux CAA 474-324

Name & Surname: Sanet

Date & Time: 2025-07-23 15:41:46

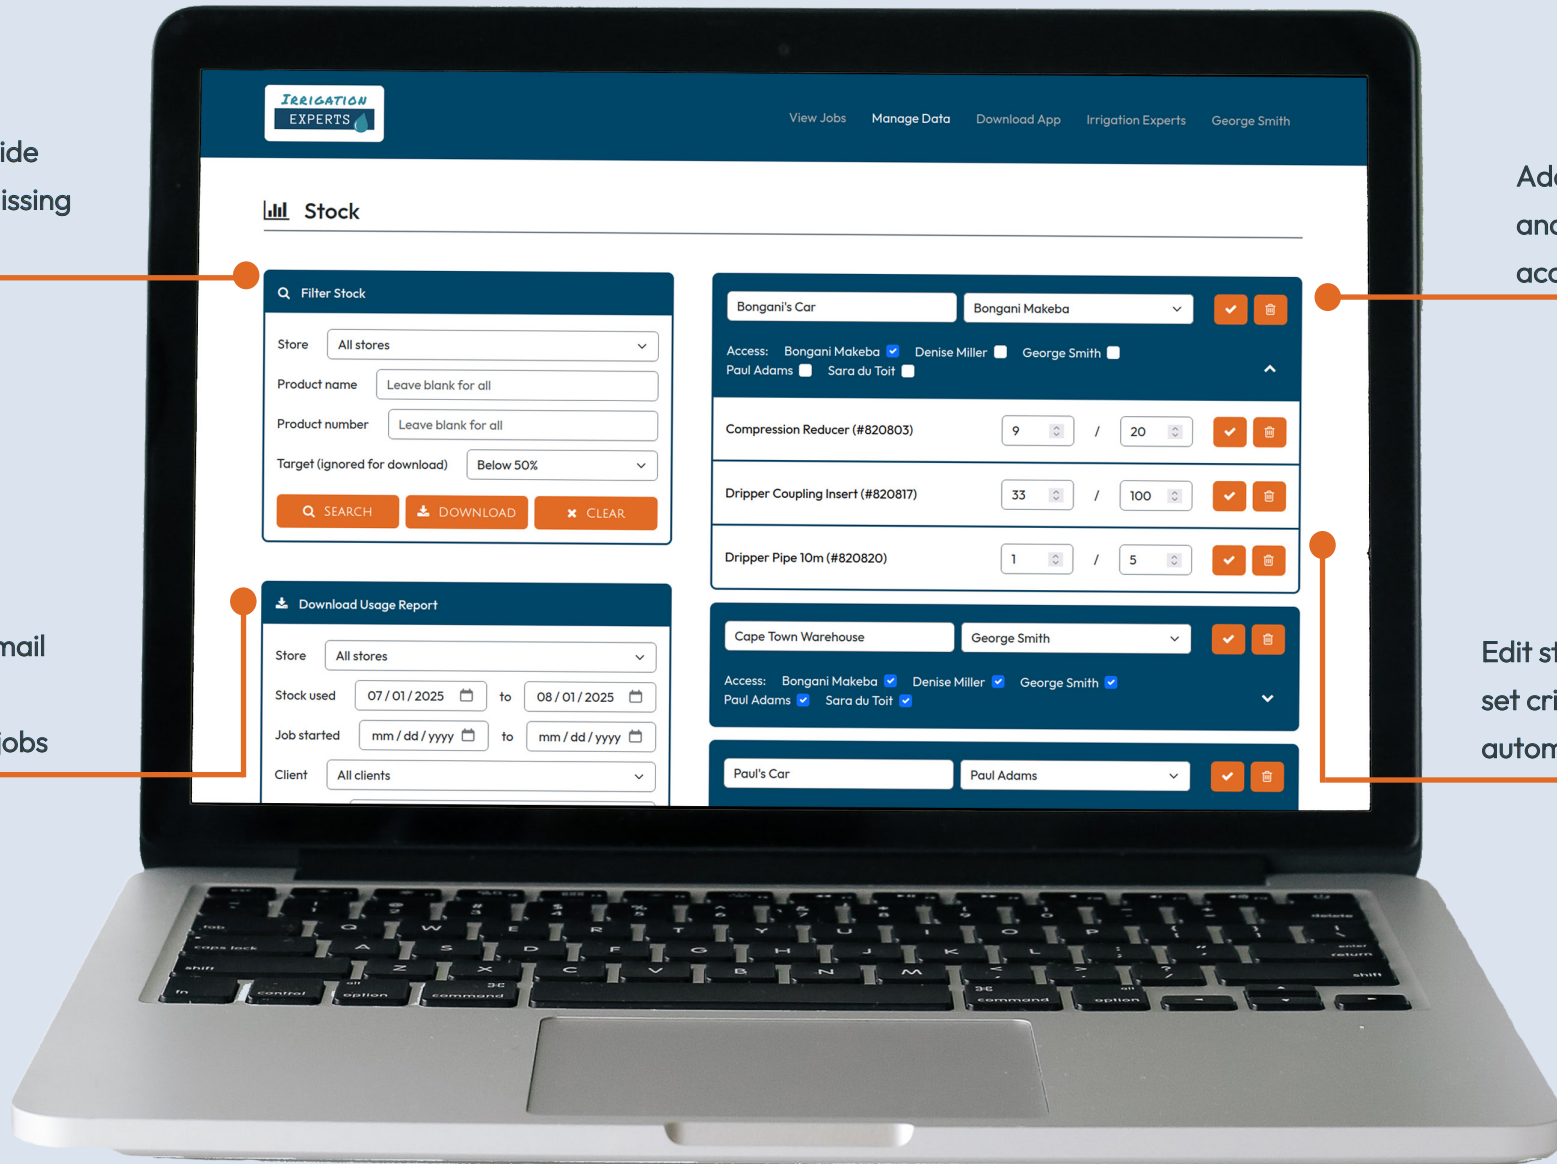

7 MANAGE STOCK AND SET ALERTS

Search system-wide
to easily locate missing
products

Download and email
stock reports for
products used in jobs

Add product stores
and manage user
access

Edit stock levels and
set critical targets for
automated alerts

8 AUTOMATE YOUR INVOICING
