3 Access client data offline

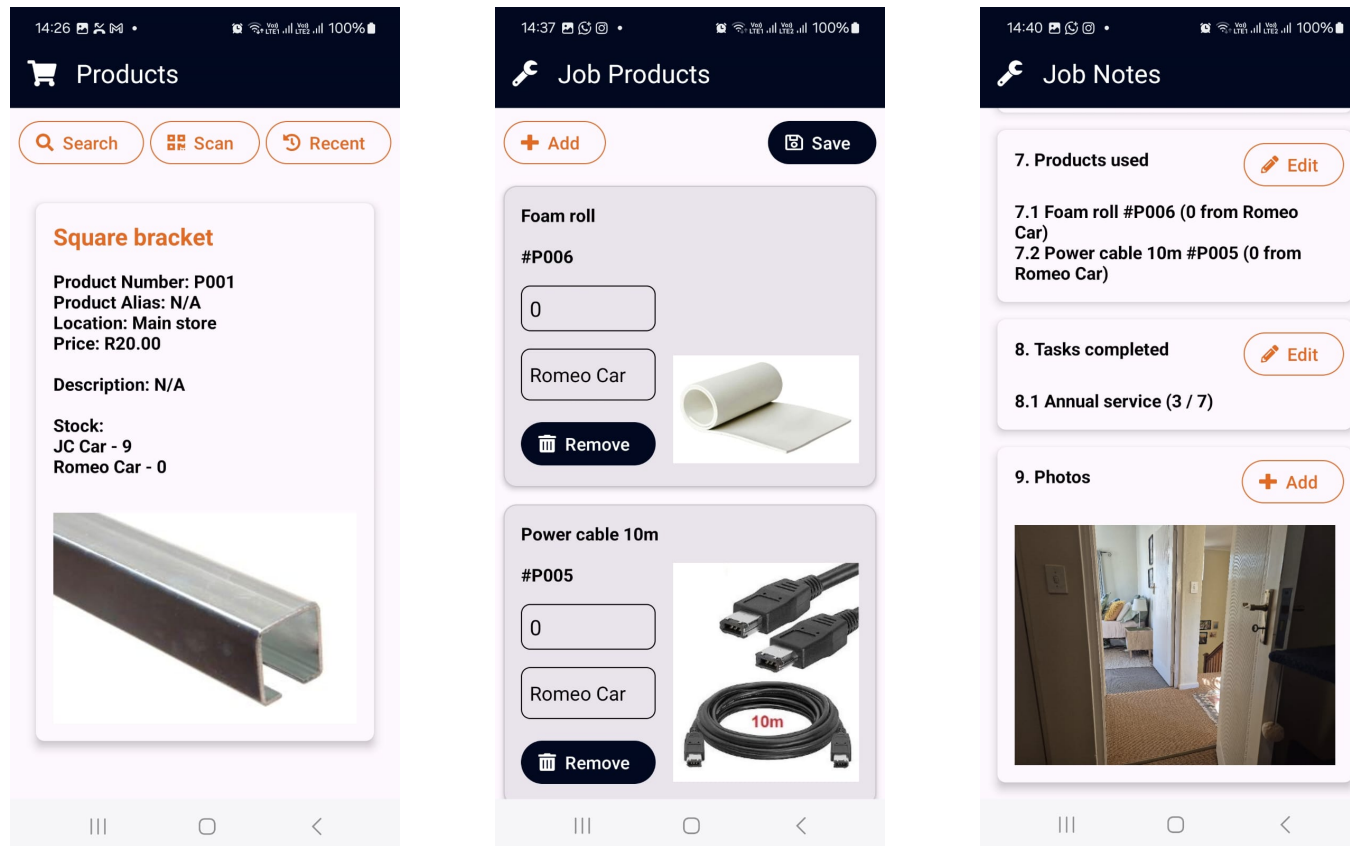

1. Filter database using wildcards for convenient access to client information [search button – top left]
2. Works completely offline but syncs when connection becomes available [network indicator – top right]
3. Integrates with Google Maps for automatic navigation to new clients [arrow button – bottom left]
4. Phone or email your clients directly without needing to save any contacts information [phone button – bottom right]

4 Start jobs and make notes

1. Nearby clients are automatically detected for new jobs, otherwise choose from client list [new button – top left]
2. Access historic data from all past jobs for easy future reference [past button – top middle]
3. Pause and resume jobs to accurately capture billable hours [pause button – top right]
4. Mark checklists for routine tasks, with timestamps for each item [checkbox – bottom left]
5. Make job notes using text boxes and drop-down lists that immediately sync system-wide [field number 2 – bottom right]

5 Add products and photos

1. Search for products to add or scan QR codes directly from the app [search, scan and recent button – top left]
2. Specify quantity and product store for each product [top two text boxes – top right]
3. View system-wide stock levels and add or remove stock from the app [stock section – bottom left]
4. Use product images to minimize mistakes in products used [image in middle – bottom middle]
5. Add photos for future reference without using any local disk space [photo on right – bottom right]

6 Submit jobs and generate reports

14:39 100% Finalize Job

Completed: 2025-05-27 14:39
Duration: 50 hour(s) 0 minute(s)
Coordinates: 33.9684° S, 18.8632° E
Coordinates status: Match

11. Time worked:

27 hour(s) 15 minutes(s)

12. Client signature
